

## Kaoru Kaganuma Chief Product Officer (CPO)

Kaoru Kaganuma is responsible for shaping and scaling the product vision at eleQtron. With a strong background in engineering and product strategy, he brings extensive international experience in transforming cutting-edge technologies into market-ready products. Kaoru has worked for some of the world's leading Deep Tech companies in Silicon Valley, including Apple, Intel, and Tesla. He brings this expertise in product development, industrialization, and scaling of complex hardware technologies to eleQtron.

### Quote:

“Our goal is to translate scientific excellence into reliable, scalable products. At eleQtron, we have the unique opportunity to define how quantum computers move from the lab into real-world applications – and to set new standards for industrial quantum technology.”

### CV:

Kaoru holds a degree in Electrical Engineering and has built his career at the intersection of technology, product development, and industrial implementation. He gained international experience in senior positions at leading global technology companies, where he was responsible for complex hardware products and large-scale technology platforms. As Chief Product Officer at eleQtron, Kaoru leads the development, maturation, and industrial scaling of the company's quantum computing products.
